Promoted by the Escola Europea – Intermodal Transport, TransLogMed aims to establish an efficient, interoperable, and sustainable transport infrastructure network in the Euro-Mediterranean region. Through that, it strives to foster regional integration in the Mediterranean, enhance professional performance, as well as promote employment and gender equality in the transport and logistics sector.

How?

Training actions supporting the development of door-to-door logistics and the implementation of efficient maritime-related intermodal transport solutions.

PROVIDING SOLUTIONS

- Promote intermodal solutions, including maritime transport, as well as road, rail or inland navigation.

BUILDING CAPACITIES

- Enhance the competencies of ports, logistics operators and transport administrations through the implementation of 30 seminars and certified courses benefitting 1,000 professionals.

IMPLEMENTING SERVICES

- Develop sustainable transport chains and door-to-door logistics activities.
